

**Mathematics Assessment Program** *CCR-C1*

## **College and Career Readiness Mathematics**

### **Scoring Rubric (Draft)**

These tests were developed with support from the Bill and Melinda Gates Foundation

<b>Short Tasks</b>		
<b>Q</b>	<b>Answer</b>	<b>Points</b>
1	$x = 1$ or $-4$	1
2	( $x = 7$ ) length 12 cm width 5 cm	1
3	17 or $-17$	1
4	$2x - y = 0$	1
5	$\frac{8}{14} = \frac{4}{7}$	1
6	$1.27 \times 10^4 + 1.2 \times 10^2$ $= 2.712 \times 10^4$	1
7	$a - b$	1
8	$x = 32$ and $y = 8$	1
9	$-\frac{3}{4}$	1
10	Yellow: 43cm Red: 55cm Answer: Red	1
<b>Total</b>		<b>10</b>

<b>Multiplying Cells</b>								<b>Rubric</b>	
:								Points	Section points
1.	Fills in the table correctly:							2	2
	Time	0	20	40	60	80	100		
	Number of cells	1	2	4	8	16	32	64	
2.	Fills in the table correctly:							2	2
	Time	0	20	40	60	80	100		
	Number of cells as power of 2	$2^0$	$2^1$	$2^2$	$2^3$	$2^4$	$2^5$	$2^6$	
3.	Gives a correct answer: $2^9$ ( allow 512 )							1	2
	Gives a correct explanation such as: 3 hours is 9 lots of 20 minutes and the power of 2 equals the number of 20 minutes which have passed.							1	
4.	Gives a correct answer: <b>32768</b> Shows correct work such as: $5 \text{ hours} = 5 \times 3 \text{ lots of } 20\text{-minutes} = 15 \text{ lots of } 20\text{-minutes}$ $2^{15}$							1	2
								1	
5.	Gives a correct answer: <b>340 minutes or 5 hours 40 minutes</b> Shows correct work such as: $2^{16} = 32768 \times 2 = 65536$ $2^{17} = 65536 \times 2 = 131072$ $17 \times 20$							1	2
								1	
<b>Total Points</b>									<b>10</b>

		Rubric																					
				Points	Section points																		
1.	<p>Gives correct answers:</p> <table border="1" style="margin-left: 20px;"> <thead> <tr> <th>Graph</th> <th>Equation</th> <th>Table</th> <th>Rule</th> </tr> </thead> <tbody> <tr> <td>A</td> <td>C</td> <td>B</td> <td>A</td> </tr> <tr> <td>B</td> <td>D</td> <td>A</td> <td>C</td> </tr> <tr> <td>C</td> <td>B</td> <td>C</td> <td>D</td> </tr> <tr> <td>D</td> <td>A</td> <td>D</td> <td>B</td> </tr> </tbody> </table> <p>Allow 1 point for each two correct answers.</p>	Graph	Equation	Table	Rule	A	C	B	A	B	D	A	C	C	B	C	D	D	A	D	B	6	6
Graph	Equation	Table	Rule																				
A	C	B	A																				
B	D	A	C																				
C	B	C	D																				
D	A	D	B																				
2.	Gives correct explanations such as:																						
(a)	<b>Equation C is a quadratic curve that passes through the origin and is symmetrical about the y axis, so this is Graph A.</b>	1	1																				
(b)	<b>Equation D is the equation of a straight line, so this is Graph B.</b>	1	1																				
(c)	<b>Equation B is a quadratic curve that passes through the origin and is symmetrical about the x axis, so this is Graph C.</b>	1	1																				
(d)	<b>Equation A is an inverse (hyperbolic) function: the graph approaches, but does not cross the axes (the axes are asymptotes) so this is Graph D.</b>	1	1																				
<b>Total Points</b>			<b>10</b>																				

Charity Fair		Rubric	
		Points	Section points
1.	Gives correct answer: <b><u>1</u></b> <b>16</b> Shows work such as: probability (all red) = $(1/4)^3 = 1/64$ probability (all the same color) = $4 \times (1/64) = 1/16$	1  1	2
2.	Gives correct answer: <b>No</b> <b>and</b> May show that: If 16 people play once, they pay $16 \times 25\text{¢} = \$4$ On average, 1 person wins \$5 So the charity loses. ( $\$4 - \$5 = -\$1$ ) Accept alternative correct reasoning	2 ft	2
3.	Suggests changes such as: <i>Change 1</i> Have <b>more colors</b> , say 5. Calculates $\text{prob}(\text{all the same color}) = 5 \times (1/5)^3 = 1/25$ States that if 25 people play once, <b>the charity gains</b> . ( $\$6.25 - \$5 = \$1.25$ )	1 1 1	3
	<i>Change 2</i> Have <b>more barrels</b> , say 4. $\text{prob}(\text{all the same color}) = 4 \times (1/4)^4 = 1/64$ If 64 people play, <b>the charity gains</b> . ( $\$16 - \$5 = \$11$ )	or 1 1 1	or  3
	<i>Change 3</i> <b>Increase the price</b> to 50 cents If 16 people play once, <b>the charity gains</b> . ( $\$8 - \$5 = \$3$ ) Alternatively, <b>decrease the amount won</b> from, say, \$5 to \$3. If 16 people play once, <b>the charity gains</b> . ( $\$4 - \$3 = \$1$ )	or 1 1 1	or  3
<b>Total Points</b>		<b>max</b>	<b>10</b>

<b>Patchwork</b>		<b>Rubric</b>																			
		Points	Section points																		
1.	<p>Correctly completes the table: 1 point triangles , 2 points squares</p> <table border="1"> <thead> <tr> <th>Size (n)</th> <th>Number of triangles (t)</th> <th>Number of squares (s)</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>4</td> <td>0</td> </tr> <tr> <td>2</td> <td>8</td> <td>4</td> </tr> <tr> <td>3</td> <td>12</td> <td>12</td> </tr> <tr> <td>4</td> <td>16</td> <td>24</td> </tr> <tr> <td>5</td> <td>20</td> <td>40</td> </tr> </tbody> </table>	Size (n)	Number of triangles (t)	Number of squares (s)	1	4	0	2	8	4	3	12	12	4	16	24	5	20	40	1 2	3
Size (n)	Number of triangles (t)	Number of squares (s)																			
1	4	0																			
2	8	4																			
3	12	12																			
4	16	24																			
5	20	40																			
2.	<p>Verbal rule: The number of triangles is four times the size of the cushion.  <b>or</b> An algebraic rule: <math>t = 4n</math>            Explanation: Each cushion has four edges: each edge has the same number of triangles as the size.  <b>or</b> From the table, as the size of the cushion increases by 1' the number of triangles increases by 4.</p>	1 <b>or</b> 2 1 <b>or</b> 1	3																		
3.	<p>A stepwise verbal rule:            The number of squares increases by 4, then 8, then 12, then 16 ....: increasing multiples of 4.  <b>or</b> The number of squares + the number of triangles for any size is equal to the number of squares for the next size. e.g.: <math>16 + 24 = 40</math>  <b>or</b> An algebraic rule: <math>s = 2n(n - 1)</math> or equivalent algebraic rule.            Explanations relating to the cushion design, such as the following.            Stepwise rule: Each triangle of one size becomes a square in the next size. <b>or</b>            Algebraic rule: Each cushion has four sections: if we put two sections together, we get two rectangles, size <math>n</math> by <math>(n - 1)</math> .</p>	1 <b>or</b> 1 <b>or</b> 2 1	3																		
4.	<p>Stepwise rule: continues sequence to find that when <math>s = 180</math>, <math>t = 40</math>  <b>or</b>            Algebraic rule: finds that when <math>s = 180</math>, <math>n = 10</math> : when <math>n = 10</math>, <math>t = 40</math>.</p>	1 <b>or</b> 1	1																		
<b>Total Points</b>			<b>10</b>																		

<b>Square</b>		<b>Rubric</b>	
		Points	Section points
<p>1 Gives correct answer: <b>5</b></p> <p>Uses the Pythagorean correctly, but incorrect answer.</p> <p>Attempts to use the Pythagorean Rule</p>	<p>3</p> <p>(2)</p> <p>(1)</p>	<p>3</p>	
<p>2 Gives correct answer: <b>-3/4</b></p>	<p>2</p>	<p>2</p>	
<p>3. Gives correct explanation such as:</p> <p>The slope of DA = <math>4/3</math> = slope of CB</p> <p>The slope of AB = <math>-3/4</math></p> <p>Therefore the sides of the shape are perpendicular</p> <p>The lengths of AB and AD are 5</p> <p>Therefore the shape is a square.</p> <p><i>Partial credits</i></p> <p>For some correct work.</p>	<p>5</p> <p>(4)</p> <p>to</p> <p>(1)</p>	<p>5</p>	
<b>Total Points</b>			<b>10</b>

<b>Circles and Squares</b>		<b>Rubric</b>	
		Points	Section points
<p>Gives correct answer: The ratio of the areas of the two squares is 1:2</p> <p>Shows correct work such as:            Draws construction lines from the center of the circle to the vertices of the small square.</p> <p>If the large square has side of length <math>x</math>, then, using the Pythagorean Theorem gives the length of the sides of the small square are <math>\sqrt{2}x/2</math>.</p> <p>The area of the large square is <math>x^2</math>.</p> <p>The area of the small square is <math>x^2/2</math></p> <p>Accept alternative methods.</p>		1	
<p>Gives correct answer: The ratio of the two areas is 1:2</p> <p>If a second circle is inscribed in the smaller square, using the Pythagorean Theorem gives the radius of the small square is <math>\sqrt{2}x/4</math></p> <p>The area of the large circle is <math>\pi(x/2)^2 = \pi x^2/4</math></p> <p>The area of the small circle is <math>\pi(\sqrt{2}x/4)^2 = \pi 2x^2/16 = \pi x^2/8</math></p> <p>Accept alternative methods.</p>		4
