This diagram shows some trees in a tree farm.
The circles show old trees and the triangles show young trees.
Tom wants to know how many trees there are of each type, but says it would take too long counting them all, one-by-one.

1. What method could he use to estimate the number of trees of each type? Explain your method fully.
2. On your worksheet, use your method to estimate the number of:
(a) Old trees
(b) Young trees
